

Piper PA-60 "Aerostar"

The Aerostar is a short-haul, off-airport aircraft for remote areas. Like the Chieftan, it can also come with turboprop engines. Good for small packages, such as medical supplies, and can operate on dirt and gravel runways. Also a good alternative to using larger aircraft that cost more, such as the DC-3, for delivering small cargo loads. Can easily be converted from a passenger to cargo aircraft.
